

Atlas de l'activité d'hospitalisation à domicile (HAD) en Ile-de-France en 2022

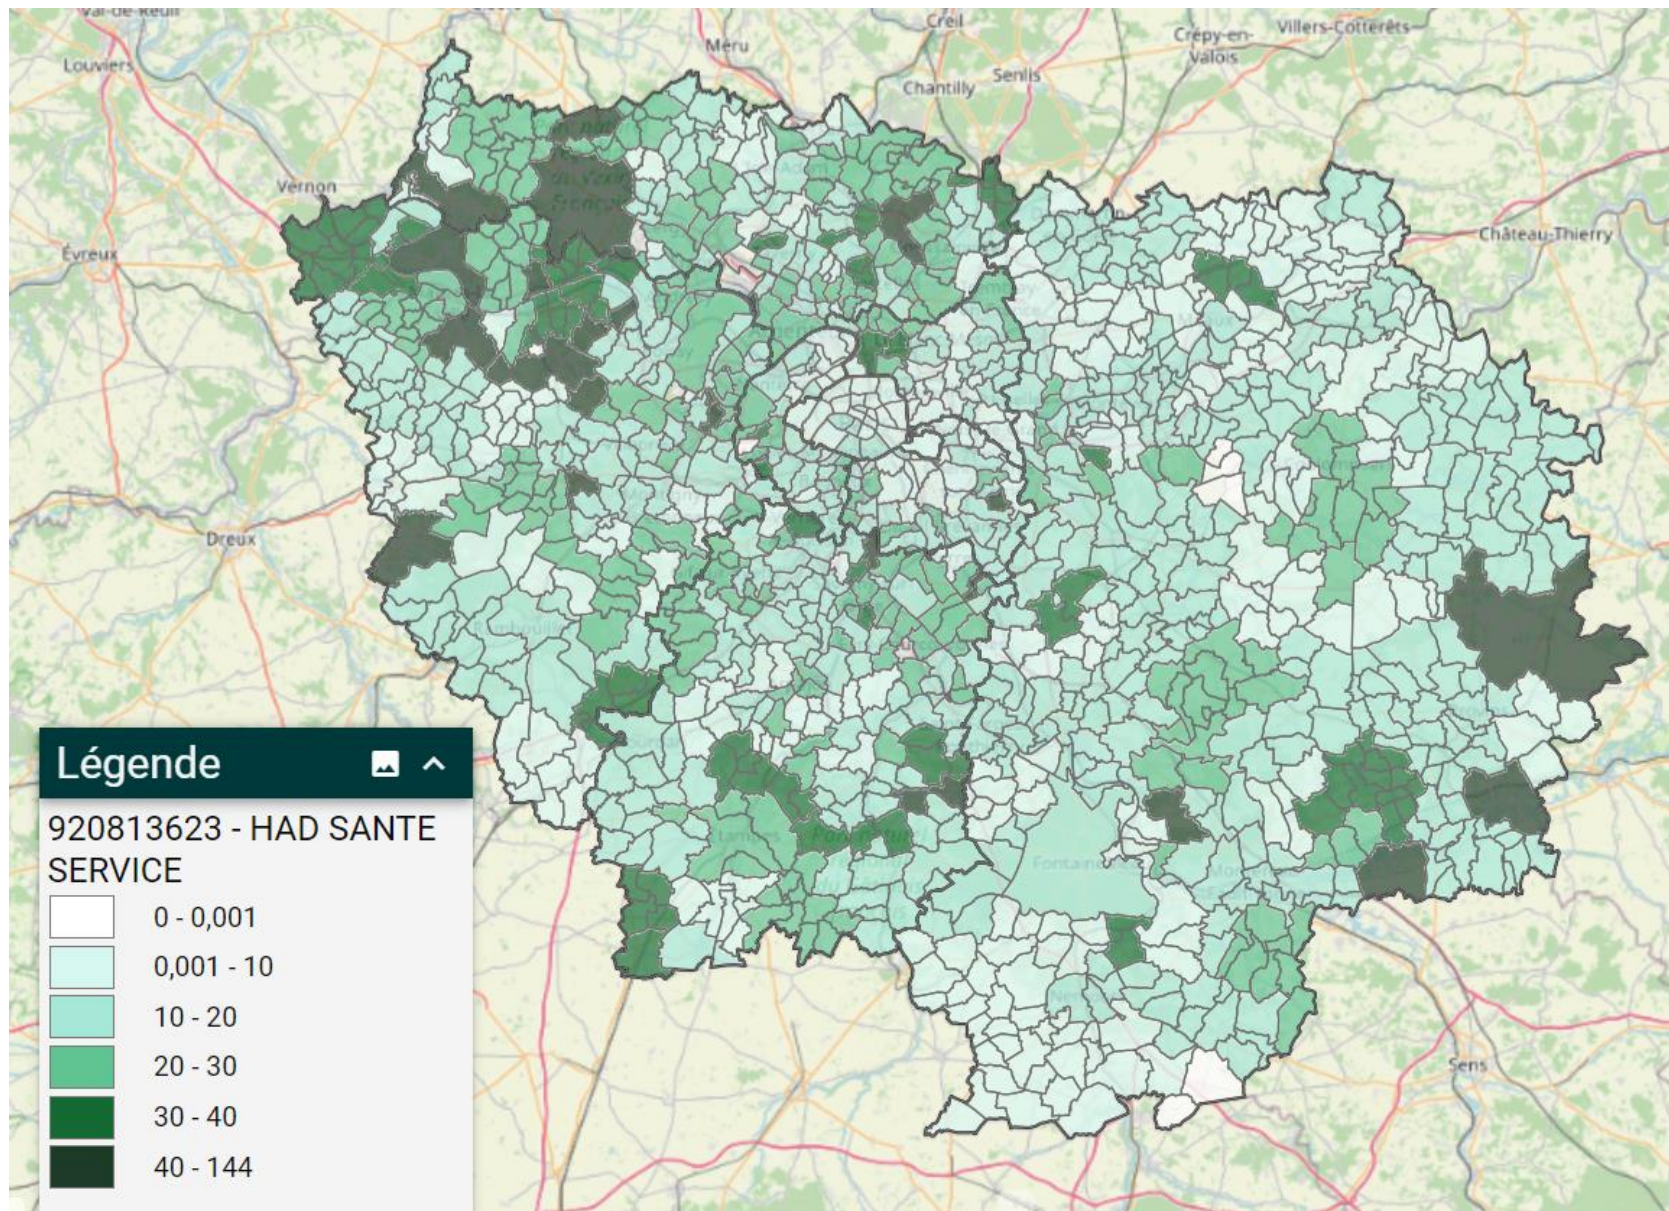

Éléments de méthode

- Le taux de recours est le nombre de journées HAD produites par jour et pour 100 000 habitants d'un territoire donné
- Les données au numérateur (nombre de journées HAD produites) sont issues du PMSI HAD interrogé via l'outil décisionnel DIAMANT
- Les données au dénominateur (population) sont issues de l'INSEE via DIAMANT
- L'outil SantéGraphie © a été utilisé pour réaliser les cartes
