

WHY VACCINATE 5-11 YEAR OLD CHILDREN?

MORE THAN 10 MILLION CHILDREN
WORLDWIDE HAVE ALREADY RECEIVED
THE VACCINE!!

THE VACCINE IS SAFE, EFFECTIVE AND
SPECIALLY DEVELOPED FOR CHILDREN.

AS WITH OTHER VACCINES, THE DOSE IS CLEARED
FROM THE BODY IN A FEW DAYS.

TIREDFNESS, FEVER
BREATHLESSNESS
COUGH:
I DON'T WANT
MY CHILD
TO BE SICK.

HOSPITALISATION,
LONG COVID: I DON'T
WANT TO RISK MY CHILD'S
HEALTH, I WANT TO
PROTECT MY CHILD.

WE HAVE VULNERABLE
PEOPLE IN OUR FAMILY;
MY CHILDREN WANT
TO PROTECT THEM
FROM COVID TOO.

**Vaccinating
your child is
important.**

Speak to you doctor or
pharmacist for more
information.
